

HILTON ANAHEIM

GREEN INITIATIVES

**We are committed to sustainable practices year round.
We strive to reduce our carbon footprint on a daily basis.**

ENERGY

- Energy saving compact LED light bulbs save energy throughout the Hilton Anaheim
- All 1,576 guestrooms feature motion/door sensing setback thermostats that reduce energy usage when vacant
- Meeting rooms use a building automation system for efficient heating/cooling based on event
- Meeting rooms are equipped with motion-sensitive lighting system
- All mercury containing light bulbs are gathered and properly recycled
- Reflective white roof diminishes heat load resulting in less energy used to cool the building; this helps to lower our carbon emission

WATER

- Meeting Planners encouraged to use water service vs individual water bottles
- Partnered with Clean the World in 2014 to recycle unused soap and plastic personal hygiene bottles in guest rooms
- Guest bathrooms use low-flow 1.28 gallon flush toilets and low-flow shower heads

- Continuous batch wash system reduces water usage in laundry by 60% (When installed we saved 675,000 gallons of water in one typical month- data from June 2008)
- Linen and towel reuse program for guest rooms

WASTE REDUCTION

- ORCA Food Digester “digests” all food waste into environmentally safe water that can flow into the municipal sewage system
- Kitchens recycle cooking oil

MISCELLANEOUS

- Fitness center uses shampoo/ body wash dispensers in place of individual bottles
- Blue Energy team was created to spearhead new and innovative eco-friendly operations throughout Hilton Anaheim
- Purchasing preference is given to environmentally responsible service suppliers
- Dry cleaning supplier uses environmentally friendly products
- Local, organic and vegetarian dining options are incorporated into menus
- Digital signage has replaced paper for the majority of meetings
